QUARTER 2 NEWSLETTER

Your Money is **Safe and Secure**

Did you know that credit unions operate differently from banks, which are more likely to engage in riskier ventures? As a credit union member at Maple FCU, you are an owner of our not-for-profit financial cooperative. **Our first priority is your financial success, and we focus on financial security.**

- Deposits in federally insured credit unions are safe and secure. We are federally insured and your deposits are protected by the National Credit Union Share Insurance Fund and insured up to at least \$250,000 per individual depositor — the same as any other federally insured financial institution. You can visit **MyCreditUnion.gov** for more information about the National Credit Union Share Insurance Fund coverage for members.
- The first credit union in America was founded in 1909. Since that time, **no credit union member has ever lost a penny of insured savings at a federally insured credit union.**
- We are examined regularly by the National Credit Union Administration and just completed our exam last month with *no* substantial findings.
